Summary

Hardworking, proactive, creative, and detail-oriented **Mathematics graduate** with an **MSc in Artificial Intelligence + Data Engineering** in its final stage. Hands-on experience developing a production-oriented LLM inference backend for HPC deployment (Qualígrafo). Applied experience in machine learning, NLP, RAG/KAG systems, computer vision, deep learning (CNNs, graph neural networks), anomaly detection and large-scale pipelines (Spark, Kafka, BigQuery). **Available for internships until July 2027** through a university internship agreement.

Experience

Backend AI Engineer / LLMops – Internship

Mar 2026 – May 2026

Qualígrafo S.L. · Mimesis Platform

Granada, Spain (Remote)

- **AI Assistant Backend (HPC):** Migrated the API (FastAPI) of an AI assistant for psychologists and researchers (2 mixed-methods pipelines of 4 phases each, with 10 endpoints) to an asynchronous job-based system, avoiding timeouts on long-running executions. Validated the architecture for the SCAYLE supercomputing cluster.
- **Structured output validation:** Implemented JSON Schemas and real-time validation with Pydantic for 8 prompt stages in an orchestrated LLM pipeline.
- **Inference flexibility:** Developed an abstraction layer with LangChain to switch between 3 LLM providers (Ollama, Groq, Azure OpenAI) to optimize latency and cost depending on the environment.

Skills

Languages & Backend: Python, SQL, FastAPI, Pydantic, MATLAB.

ML, NLP & Vision: Scikit-learn, LightGBM, Transformers (Hugging Face), spaCy, LLMs (Llama 3.3 via Ollama and Groq), LangChain, RAG/KAG, Pandas, NumPy, Computer Vision, Unsupervised Learning (PCA, Isolation Forest).

Deep Learning: TensorFlow/Keras (MLPs, CNNs), PyTorch, PyTorch Geometric, GNN (GraphSAGE, GIN, GATv2).

Quantum Computing: Qiskit, Qiskit Aer, IBM Quantum Runtime.

Cloud & Data Engineering: Google Cloud (GCP): BigQuery, Cloud Storage, Dataproc, Apache Spark, Apache Kafka.

Infrastructure & MLOps: Git, Linux, Docker, MLflow, W&B, DVC, Uvicorn.

AI-Assisted Development: Claude Code, GitHub Copilot, Gemini.

Projects

🔗 Quantum Noise Mitigation with AI – Master’s Thesis

2026

| Python, PyTorch Geometric, Qiskit Aer, Scikit-learn, W&B, DVC, GCP 🎓 MSc AI · UNIR

Developed pre-execution noise prediction for quantum circuits (20K circuits, real IBM calibration): Random Forest beat GNNs (GraphSAGE, GIN, GATv2) overall, with up to 81% error reduction; GNNs only won on larger, unseen circuits.

🔗 RAG vs KAG – University Regulations Assistant

2026

| Python, txtai, networkx, Llama 3.3, Ollama

Built a RAG vs KAG comparison on academic regulations: 3 retrieval engines (dense, BM25, hybrid) with txtai versus a Knowledge Graph (networkx) for multi-hop reasoning over implicit rules not present in the text, answering questions where plain RAG returned “I don’t know”.

🔗 Hate Speech MLOps: Classification Pipeline & Model Serialization

2026

| Python, Scikit-learn, LightGBM, Optuna, SHAP, Joblib

Designed a modular binary classification pipeline with Bayesian optimization (Optuna), explainability audit (SHAP) and production-ready *end-to-end* serialization. Reached 0.975 ROC-AUC and 0.91 F1-macro on test after detecting and removing data leakage.

🔗 Walmart Sales EDA with Google BigQuery

2026

| SQL, Google BigQuery, Cloud Storage 🎓 MSc AI · UNIR

Conducted SQL exploratory analysis of 421K weekly sales records from 45 stores: data quality checks (nulls, duplicates, invalid ranges, referential consistency), analytical views and KPIs. Found that type C stores are the most efficient per square foot.

Education

International University of La Rioja (UNIR) 🔗 [coursework]

Online

MSc in Artificial Intelligence + Data Engineering Specialization

Nov 2025 – Present

Master’s Thesis: Pre-execution noise prediction for *quantum circuits* with ML and graph neural networks.

University of Granada (UGR) 🔗 [bachelor’s thesis]

Granada, Spain

Bachelor’s Degree in Mathematics

2021 – 2025

Completed within the standard timeframe (4 years) in the academic program **ranked No. 1 in Spain** (ShanghaiRanking GRAS 2025, Mathematics).

Languages

Spanish / Armenian: Native | **Valencian:** C1 | **English:** B2 (professional working proficiency)
